• About Me

"In the world of Web Development, I am Yasir Arafat. I design and develop personal and business websites, strictly adhering to the core principles of dynamism, responsiveness, and Search Engine Optimization (SEO). Through the expert synergy of front-end and back-end components, I am dedicated to offering more than what is expected in every project."

• Work Experience

- Web Design & Development:
- Full-Cycle Web Design utilizing WordPress and expert use of Elementor for high-quality, responsive site building.
- Implemented and managed WooCommerce solutions, configuring payment systems, products, and advanced e-commerce functionality.
- Responsible for comprehensive WordPress Security implementation (firewalls, malware protection) and conducting reliable Website migration & Backup services with zero data loss.
- Optimized website performance, resulting in [X]% improvement in loading speed and user experience.
